RL9000 TWM

light- to heavy-capacity
mount assembly

The RL9000 TWM tank weigh module's stainless steel construction provides accurate weighing technology for hostile environment applications. Its low profile configuration maximizes space and its all-in-one construction minimizes installation time. Furthermore, the RL9000 TWM will accurately weigh even if the base is off level by as much as 3°.

A broad range of weighing capacities from 1,000 lb to 450,000 lb enables its use in virtually any weighing application. What's more, the 100% uplift protection and self-checking design provide extreme durability. The RL9000 TWM comes standard with welded seal but is available with hermetic seal if required.

Overall, the streamlined design of the RL9000 TWM provides accuracy and durability in hostile environment weighing applications.

Standard Features

- Capacities per assembly: 1000 lb – 450,000 lb
- Self-checking in all directions eliminates external hardware
- 100% uplift protection
- All-in-one construction minimizes installation time
- Welded seal load cell
- Weighs accurately with up to a 3% unparallel loading
- 300% overload protection
- Stainless steel for hostile environment applications
- Low-profile design

Options

- Hermetically sealed load cell

Vertical & Horizontal Vessel Arrangements
